

SUCHITRA M

Bangalore, India | suchithra2405@gmail.com | +91-88673-72550 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring Software Engineer pursuing a B.E. in Artificial Intelligence & Machine Learning, with a solid foundation in computer science fundamentals, data structures & algorithms (55+ problems solved on LeetCode), and hands-on experience building full stack web applications using Java, Spring Boot, Spring MVC, Hibernate (JPA), JSP, J2EE, React.js, JavaScript, HTML, CSS, and MySQL. Skilled in REST API development, database integration, object-oriented design, and Git, with basic exposure to Python and networking/OS concepts. Passionate about solving complex engineering problems and continuously learning new technologies.

EDUCATION

Sri Krishna Institute of Technology — Bangalore, India Nov 2023 – June 2027 (Expected)
Bachelor of Engineering in Artificial Intelligence & Machine Learning | GPA: 7.1 / 10

MES College — Bangalore, India Sep 2020 – Aug 2022
Pre-University Course (PUC) | Percentage: 87%

Jindal Public School — Bangalore, India June 2019 – June 2020
Class 10 (SSLC) | Percentage: 93%

TECHNICAL SKILLS

Languages & Databases: Java, Python (Basic), JavaScript, MySQL, HTML, CSS

Backend Development: Spring Boot, Spring MVC, Hibernate (JPA), JSP, J2EE, RESTful APIs

Frontend: React.js, Bootstrap

Tools: Git, GitHub, Postman

Core Concepts: Object-Oriented Programming (OOP), MVC Architecture, Data Structures & Algorithms, Computer Networks & OS Fundamentals, JWT Authentication, Role-Based Access Control

PROJECTS

Smart Waste Management | [GitHub](#)

- Developed a responsive full-stack web application using **Java, Spring Boot, Spring MVC, Hibernate (JPA), React.js, and MySQL** with role-based dashboards for Citizens, Collectors, and Admins. Designed responsive and interactive user interfaces using **React.js and JavaScript** for complaint reporting and real-time status tracking.
- Built analytics dashboards and an eco-points reward system with leaderboard functionality to drive citizen engagement.
- Integrated MySQL database using **Hibernate (JPA)** and REST APIs for efficient data management.

Job Portal | [GitHub](#)

- Integrated MySQL database using **Hibernate (JPA)** and REST APIs for efficient data management.
- Implemented secure authentication using JWT and developed RESTful APIs.
- Developed CRUD functionalities for job posting, resume upload, search & filtering, and application management.
- Used Git and GitHub for version control and collaborative development.
- Integrated MySQL database using **Hibernate (JPA)** and REST APIs to manage users, jobs, and applications efficiently.

ACHIEVEMENTS

HACK.IO Hackathon — Team Lead

- Led a team in developing a Hospital Queue Management system, integrating the Twilio API for real-time SMS alerts to patients, improving patient flow efficiency.

Competitive Programming

- Solved 60+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving, debugging, and coding proficiency.
